

BECOME A CHAMPION FOR DIVERSITY 1ST ANNUAL DOLLARS FOR DUDL CHALLENGE

Will you and your firm be one of Denver's champions for diversity, raising money for inner city debate? Be part of our March 9-20 workplace giving campaign. Contact Jessica at JessicaClark@UrbanDebate.org, or 720.878.2776 to get started.

The DUDL is growing and we need your support!

In 2008 the DUDL began offering high school policy debate in five DPS schools. In 2014 we have grown to serve students from thirteen schools in three school districts. We have also added new individual speaking events to competitions. DUDL covers all costs associated with training and competition to ensure that resources are never a barrier for students to participate. To continue offering our life-changing programming to under-served students in our community we are asking for your help.

Will your firm, business, or organization be part of our *Dollars for DUDL* challenge? From March 9-20, businesses in the Denver Metro area will compete in a workplace giving campaign to see who can raise the most money for DUDL.

The winning organization will receive recognition in a full-page advertisement in the Colorado Lawyer, naming rights to the DUDL fall workshop, and a gold table at the DUDL Awards Banquet in May.

To participate, each organization must designate a Team Captain who will help execute the campaign in his or her workplace or organization. DUDL will supply the Team Captain with:

- ◇ A personalized giving webpage to organize and track donations
- ◇ Email templates for before, during, and after the campaign to help solicit donations
- ◇ Ideas and support for a kick-off event at your office (optional)

The winner will be announced at the DUDL City Championship on March 21st. All proceeds support DUDL's expansion to serve more students in Denver and Aurora inner city, public schools in 2015. Email JessicaClark@UrbanDebate.org to become a team captain today! Deadline to register your organization is March 6th.

Impact of Debate

- Independent peer-reviewed research proves that debate improves academic performance. Urban debaters earn higher grades than their non-debating peers and are significantly more likely to test as college-ready in English, Reading, Math, and Science.
